AeroX-500 Drone User Manual

1. System Overview

The AeroX-500 is a professional-grade quadcopter designed for extreme weather conditions, high-altitude surveying, and extended flight operations.

2. Battery Specifications

The drone utilizes a high-capacity, smart lithium-polymer system designed to maximize airtime while preventing thermal runaway.

Capacity: 8000 mAh

Voltage: 22.2V

Standard Battery Life: Up to 54 minutes.

Battery Life in High Winds: Up to 40 minutes.

2.1 Charging Safety

Never charge the battery if the ambient temperature is below 5°C (41°F) or above 40°C (104°F). Doing so voids the warranty and risks permanent cell damage.

3. Payload Capabilities

The drone supports interchangeable gimbals. Below are the supported configurations:

Sensor Type	Resolution	Lidar Included
Standard CMOS	48 MP	Yes
Thermal Vision	640x512	No
Night Vision	12 MP	No
